

Pandemic Prevention Measures for Wholesale Markets

英文版

Hand hygiene for related personnel

- 1 Put up “wash your hands” signs or posters
- 2 Improve the proximity of hand washing facilities and ensure hand washing materials are frequently replenished
- 3 Wash your hands after a set period of time or after engaging in designated activities
- 4 Wash your hands for a minimum of 20 seconds. Wearing gloves is not a substitute for hand hygiene
- 5 When being paid do not come into direct contact with customers: promote the “zero contact economy”

Pandemic Prevention Measures for Wholesale Markets

英文版

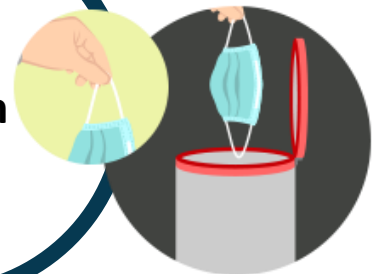

Recommended personal protective equipment

When the market is open all personnel **working on the premises must wear a face mask and face guard.** Where necessary, gloves or a water apron must also be worn

- Disposable face masks should be disposed of properly after use or if they become visibly dirty. They should not be reused
- Reusable face coverings should be cleaned at the end of every day or when they are visibly dirty. They should also be disinfected using a **75% alcohol-based** sanitizer

Pandemic Prevention Measures for Wholesale Markets

英文版

Clean and Disinfect the environment

DRAFT A PLAN, KEEP RECORDS

- Draft a plan to clean and disinfect the environment
- Keep records of cleaning and disinfection work

DISINFECT THE ENVIRONMENT AT REGULAR INTERVALS

- At least once a day
- High contact frequency surfaces or high pollution risk locations should be disinfected more frequently
- When there is visible pollution the area should be disinfected immediately

CLEAN BATHROOMS AT REGULAR INTERVALS

Clean and disinfect bathrooms at regular intervals
